Skatter for Sketchup:

Skatter is a powerful SketchUp extension that allows you to efficiently populate scenes with large amounts of vegetation, city elements, and other assets like people, furniture, and vehicles, all while keeping your model lightweight and responsive. Its "Render only" feature sends scattering data directly to render engines, enabling complex, high-detail renders without taxing SketchUp. Skatter's tools mimic nature's organic randomness, offering precise control over object placement with masks and advanced parameters, all through a clean and intuitive interface. With a non-destructive workflow and access to the extensive 3D Bazaar library of high-quality, render-ready assets, Skatter simplifies creating realistic, detailed environments.
