### ALERTE The Forces of Nature

The subtleties of nature cannot be replicated. This is why we designed each layer by optically recording the actual rain and haze in high resolution. The effects look authentic because they're real.

### SIMPLE or SOPHISTICATED

Rain and fog are dynamic effects since they appear on any surface of your photo. You can add an element of fog to the back to create a pop for your subject or put some wisps on top to make a more dimensional impression of space.

Include rain ahead of your subject to create an almost 3-D space.

The possibilities are limitless. By using these techniques, you can adjust the intensity until they blend seamlessly into the shot.
