e.World Tech PHPMaker v2024.9 (05 Mar 2024) + Extensions

2026-07-24 18:24:15

e.World Tech PHPMaker is a renowned automation solution revered for its rapid generation of PHP scripts from diverse databases such as MySQL, PostgreSQL, Microsoft SQL Server, Oracle, and SQLite. This powerful tool empowers users to craft dynamic web applications effortlessly, facilitating tasks ranging from viewing and editing records to executing advanced searches and generating insightful reports.

Moreover, **e.World Tech PHPMaker** offers versatility in creating summary reports, crosstabs, and interactive dashboards with JavaScript charts for intuitive data visualization. With a focus on flexibility, it provides an array of customization options tailored to diverse project requirements, ensuring that the resulting code is clean, straightforward, and highly adaptable for both novice users and seasoned developers.

Supported across Windows and Linux servers, boasts over two decades of experience and continuous refinement, making it a trusted ally for streamlining web development tasks. Its efficiency and quality make it indispensable for any project seeking to optimize productivity and deliver exceptional results.

Key Features of **e.World Tech PHPMaker**:

- Swift generation of PHP scripts from various databases, including MySQL, PostgreSQL, Microsoft SQL Server, Oracle, and SQLite.
- Empowers users to effortlessly craft dynamic web applications for viewing, editing, searching, and managing records.
- Supports advanced functionalities such as summary reports, crosstabs, and interactive dashboards with JavaScript charts.
- Offers extensive customization options to tailor applications to diverse project requirements.
- Produces clean, straightforward, and highly adaptable code suitable for both novice users and experienced
