A HANDCRAFTED ORIGINAL

PICKED NYLON is a unique, nylon-stringed instrument that can be easily produced. Its mellow and clean timbres make it ideal for many genres including electronica and classical, as well as distinctive styles such as flamenco and bossa nova. The powerful effects and performance control options allow you to create the perfect sound, no matter if you are creating film scores or pop songs.

DEDICATED to AUTHENTICITY

The sounds of PICKED NAILON were recorded using a master guitar-maker Lisa Weinzierl's instrument. She used rare pre amps and carefully controlled studio conditions to get the right tone. Six microphones of high quality we're used to creating three stereo sets. This allows for a variety of sounds, from organic and warm to modern and clean.

START CREATING GUITAR PARTS, FAST

PICKED NYLON includes a large library of strummed and picked arpeggios as well as delicate riffs. All of these are performed by a top-class session musician with a variety of playing styles. You can browse the wide range of song presets by genre to quickly and easily find the style that you are looking for. You can also record your parts with any MIDI controller. Then, add details such as slides, fret noise, and harmonics to make your compositions come to life.

SCULPT YOUR OWN CUSTOM SOUND

PICKED NYLON uses cutting-edge sampling technology for incredible realism. It has in-built sympathetic resonance and mod-wheel-controlled vibrato. You can also fine-tune the sounds to fit perfectly into your mix with studio-grade EQ and compressor tools.

WHERE ARTISTRY METS INTUITION

Visionary guitarist Lisa Weinzierl used carefully selected materials such as maple and spruce to create the extraordinary instrument that is PICKED NYLON's rich, clear tone. She also used centuries-old techniques that were inspired by Cremonese luthiers like Stradivarius. This video will explain Lisa's philosophy and show you how she creates guitars that sound amazing.

SOUND EFFECTS

For a quick, fun, and easy way to use all the instruments, pair PICKED NYLON and a KOMPLETE KONTROL keypad. KOMPLETE KONTROL hardware allows you to quickly browse patterns and tweak or preview sounds. You can also view information on key ranges, articulations, and more with the Light Guide.

What is Session Guitarist Picked Nylon?

"Session Guitarist Picked Nylon" likely refers to a virtual instrument or software plugin designed for music production and composition. These types of virtual instruments are used by musicians, composers, and producers to add realistic-sounding guitar parts to their music without the need for a physical guitar player.

"Session Guitarist Picked Nylon" may be a product or virtual instrument created by a music software company, and it is likely designed to help musicians and producers incorporate authentic nylon-string guitar sounds into their music productions, whether it's for acoustic ballads, Latin music, or other genres that require the warm and melodic tones of a nylon-string guitar.
