Tools　　Applications

revolutionizes the creation of user manuals, help files, and online documentation by offering a semi-automatic authoring solution. With this software, you can effortlessly generate user-friendly guides for your product within days, significantly reducing the workload on your support team. **Dr.Explain** streamlines the entire documentation process, from capturing and annotating screenshots to customizing visual styles and deploying the help system across various platforms.

Designed for a wide range of professionals beyond just technical writers, **Dr.Explain** caters to software developers, QA specialists, technical support engineers, business analysts, and even C-level executives. Its intuitive interface and automation features make it accessible to users who may not be experts in creating user manuals or help files. By eliminating the need for complex CMS systems and expensive technical writing software packages, **Dr.Explain** empowers teams to focus on product development and promotion while ensuring comprehensive and user-friendly documentation.

Key Features of **Dr.Explain** :

1. Semi-automatic authoring for user manuals, help files, and online documentation
2. Reduction of support team workload by streamlining documentation creation
3. Capture and annotate screenshots effortlessly within the software
4. Customization of visual styles and deployment across various platforms
5. Accessible to a wide range of professionals, not just technical writers
6. Intuitive interface and automation features for ease of use
7. Elimination of complex CMS systems and expensive technical writing software
8. Focus on product development and promotion while ensuring comprehensive documentation
9. Specialized text editor for creating help files with ease
