Zbrushguides - Insect Detailing Brushes for ZBrush:

Insect Detailing Brushes for ZBrush is a collection of 34 sculpting brushes designed to simplify adding intricate details and patterns to insect models and other creature designs in ZBrush.

The brushes are categorized into three groups: Lines, Noises, and Patterns, each serving a unique purpose for high-frequency detailing, linear effects, and complex patterns.

The pack is intended for use alongside the default 'Smooth Peaks' brush in ZBrush, which softens the surface without erasing finer details. Bonus materials, including custom MatCaps for iridescent effects, are also included for enhanced visualization during the sculpting process.

This versatile toolset suits realistic insect detailing and broader creature design projects.
