Gerardneedham - GN Lightroom Presets - V2:

Capture the Film Look with Precision of the Modern World
Using my latest and greatest pack of 12 presets, you can now alter your pictures while keeping modern photo editing techniques in mind. Whether you're seasoned or an amateur in the field of photography, these photography tools cater to everyone and offer versatility and an artistic touch that enhances the visual aesthetics of every image.

12 Unique Presets

- Masterfully crafted for soft, clean edits with medium saturation and contrast.
- The aim is to achieve stunning skin tones, maintaining dynamic film-like colors.

Inspired by Film & Beyond

- 5 presets inspired by some of my favorite films.
- Additionally, these twenty-five presets are highly versatile and offer landscape, seasonal, and portrait photography transforms to fit all types of shots.
- These two presets serve as a perfect basis for building your digital signature style for future edits.

Focus and Design

- The five additional presets make them even more versatile, allowing them to work for landscapes, seasons, and portraits.
- A seamless approach to style undoubtedly works best, accompanied by a raw or mobile version of Lightroom and Photoshop.

What's Included

- **12 Dynamic Presets:** Excellent with adjustable Amount Controls for misalignment
- **Installation:** Some nice detail guides are prepared in our pdf file for your help. You can follow them to install the package handily.

Version History

- **V2 Presets (2023-Present):** The latest preset collection and the most advanced one I have made.
- **V1 Presets (2019-2022):** The starting point of my creative process and a part of the previous fundamental collection.

Designed to add value to the time spent editing, every image in this collection has been enhanced to achieve the maximum level of perfection.
