AppPerfect Agentless Monitor v16.0.0.20220323-68 for Win & macOS

2025-02-20 15:55:46

AppPerfect Agentless Monitor can be described as a fully-featured and robust piece of software designed from the beginning to assist website administrators in effectively examining how their apps perform and behave. Web-based applications.

For starters, it is essential to know that this program is proud of itself for its accessibility and low resource consumption. It doesn't require users to follow complex installation and configuration processes to get it up and to run. Furthermore, it does not rely on any other tools from third parties to get the task completed.

As a fully server-based application, It allows you to access its main features using the aid of any internet browser. But, be aware that Java must be installed on your system to allow access to AppPerfect Agentless Monitor's functions. The web-based interface is extremely user-friendly even when compared to novice users' expectations.

It's crucial to mention that the application comes with many helpful monitors. The program is dubbed Java, Server, Database, NoSQL, Web Server, SNMP, Ping, Log, Transaction, and URL monitors. These modules make the tool extremely versatile.

The other feature worth you're paying attention to is the alert and notification system. It is a tool that alerts your attention via its web-based interface or more traditional methods, like SMS and email.

Of course, a program like this would not be very effective in the absence of collecting information to give you complete information about relevant scenarios. However, the application provides a wealth of reports that enable you to analyze data thoroughly and precisely trace the causes and their causes.

With the help of its "Report Designer Wizard," you will be able to enjoy visually appealing and thorough reports in HTML and PDF formats.

With everything considered, AppPerfect Agentless Monitor is likely to be one of the most balanced available applications of this type. It can provide the most robust monitors and extensive notification and reporting features yet is minimal on system resources. It is easy to use and, of course, extremely simple to set up.

AppPerfect Agentless Monitor with Great Features:

- **agentless** AppPerfect Monitor represents a new type of **Monitoring system** that is not based on the old-fashioned, agent-based monitoring method. Agents add a lot of complexity to the monitoring infrastructure, use massive amounts of resources, and create a lot of intrusions. Instead, agent-free monitors depend on remote monitoring of the services on the monitored device. The method used to monitor each device is different; however, the goal is to eliminate the need to invest massive amounts of time and energy in managing agent-based monitoring systems.
- **Purely Web-based, flexible user interface:** The AppPerfect Monitor uses an application with three layers that have a user interface that is entirely Web-based. The interface is user-friendly and user-friendly. There is no need to install huge apps or applets to keep track of the infrastructure of your applications. With just a web browser and Internet access, you can quickly and effectively monitor your infrastructure for applications from any location.
- **Ultra-lightweight device monitors:** Each compatible "device" has a corresponding "monitor" available inside the AppPerfect Monitor. They operate with their devices in a non-intrusive way. The cost associated with this kind of monitoring is usually very minimal. Most of the time, devices' built-in features can be used to retrieve data from the monitoring. The configuration of the monitors is simple and usually requires just the most basic details. There are a variety of monitors that are supported. Thanks to an accessible interface, **customized monitors** are also feasible.
- **A robust data management system:** AppPerfect Monitor provides extensive assistance to collect and manage the data collected. The frequency of data collection can be set to give the most precise overview of your infrastructure. As new devices and data expand, the assistance for consolidating data and the archiving data is available. Data purging

is available if data has been discarded or is no longer needed.

- **Advanced rules engine to alert you:** AppPerfect Monitor provides a sophisticated rules engine that helps you create intelligent rules to examine your infrastructure for application and notify you when something isn't correct. AppPerfect Monitor's UI offers the "Rule Builder," which makes the creation of rules an easy task. In contrast to other applications, AppPerfect Monitor fully supports rules where duration and time are considered apart. For instance, you can send an alert when CPU Usage remains at or above 90% for 15 minutes.
- **Automated alert notification:** If a device or application violates one of the specified guidelines, the notification server within AppPerfect Monitor will issue the "alert" and automatically notify all necessary personnel of the infraction. The people who will receive the alert will be identified if the rule is defined. Notifications can be delivered in various ways, such as SMS and email. The notification server offers an open interface that can be further developed to offer a personalized notification system.
- **The powerful infrastructure for reporting:** AppPerfect Monitor offers robust, accurate, in-the-moment, and precise reports that can aid in identifying any issues that could be affecting the system. Reports are usually utilized to analyze the data an extended period. In most cases, this analysis aids in understanding user experience. AppPerfect offers comprehensive capabilities for reporting. You can create and customize reports that offer you information specifically tailored according to your specific needs. It lets you leverage existing content in a variety of formats. A fully-featured "Report Designer Wizard" makes creating complete and high-impact presentation-quality reports easy. Reports can be created in HTML or PDF formats.
- **Access control and security:** AppPerfect Monitor provides secure access and control to all areas, including the ability to view status reports, reports, rules alerts, and so on to view reports and access the configuration section in the AppPerfect Monitor. Access is determined by groups and users and is backed by an overall super-user-controlled privilege structure.
- **Data Management**AppPerfect Monitor offers support for data consolidation, archiving, and data removal.
