平面设计　　Tutorial

Discover the secrets of nighttime interiors with How to Light Night Interiors Vol 1! From location scouting to locating lighting sources, and even adjusting your camera's temperature of color (and everything else in between) This class will help you get that silver-grey moonlight cinematic effects.

In addition to this, you will also learn about the amount and quality of your lighting sources, the right color contrast and methods for false-color exposure, and balance between the lighting of your exterior and interior!
