Using Easy Button & Menu Maker, you can easily create professional dynamic menus and elaborate buttons for your site whilst investing only a couple of minutes of your time. Over 250 tasteful layout templates have been included, representing various trendy design fashions. Easy Button & Menu Maker provides you two strong tools - menu manufacturer and button maker in 1 package. Now generates pure CSS menu!

As the program's name indicates, Easy Button & Menu Maker lets you create menus and buttons for your sites.

The interface of this program is straightforward and easy to navigate through. It is possible to initiate a new job by importing menu and button templates, and you can begin configuring them.

Thus, you may edit text and then change the font style, size, and orientation, in addition, to add hyperlinks and modify the icon of switches.

However, you might also empower button cartoons and change the button size, pick menu colors, place the spacing and padding, define button and submenu arrows, together with menu shadows and transparency, and much more.

In addition to this, it is possible to save buttons as menus and images as an HTML page, add things into webpages, save jobs for additional editing, use the undo and redo functions, pick all items in your list, change the background color, and much more.

The simple-to-use program demands a low-to-moderate quantity of program resources, includes a brief help file (too bad it does not have snapshots), and is conducted smoothly during our evaluations. On the flip side, we expected to discover more attributes. By way of instance, you can't configure any app settings. We mostly suggest Easy Button & Menu Maker to first-time customers.
