TMS FNC Push Notifications v1.0.0.0 (10 Mar 2025) for Delphi & CB XE7-D12 Athens Full Source

2026-06-09 16:17:14

Through , users can easily control and distribute push notifications that work across all development platforms, which include desktop, mobile, and web applications. The codebase from Delphi and C++Builder environments delivers notifications to any platform through full support for VCL, FireMonkey (FMX) and TMS WEB Core. The system features both speed and reliability, together with adaptability, which allows you to modify notification handling to suit your project requirements.

One of the best features is that you do not need to use external services for your functions. Despite running your data within your control, you maintain the best security standards. Your systems enable secure and efficient message delivery to mobile apps and browser-based web apps using this solution.

Key Features of **TMS FNC Push Notifications** :

1. **Cross-Platform Compatibility:** Works with VCL, FMX, and TMS WEB Core so you can write once and deploy everywhere.
2. **Single High-Performance Codebase:** Use one optimized codebase for all platforms, simplifying development and maintenance.
3. **Modular & Customizable Design:** Components are built to be flexible—easily configure them to fit the structure and behaviour you need.

所有软件资源 100%安全 已检测 无病毒 无篡改
