SOUND EFFECTS

HA•PI - Concert Harp - Sonuscore: When the words cannot be used, music develops its strength. The emotional sensitivity that is the Concert Harp plucks the right strings to soothe even the most difficult of hearts.

Simple strums from ha*pi's strings can transform into eerie and ethereal soundscapes with the Glow slider. In addition, the recording of ha*pi was made using 5 round robins. It features knobs that can alter the release, attack, dynamic range, sound, tone, and mix between two recorded harmonics and naturals. For your convenience, we've provided 11 color presets for you to select directly from our user interface.

ha*pi is a heavenly-inspired concert harp with shimmering tones and a mysterious ambiance.

Gfx plugin details of Sonuscore ha•pi Concert Harp
The product is in **SOUND EFFECTS category** , for more information about this post you can click on the home page link in the sidebar.

- A lightweight, sleek interface

How to install

1. INSTALLATION

After the purchase please download the zip files completely to a destination of your choice.
Unzip the files and open the file "ha pi.nki" with your KONTAKT sampler.

2. MAIN PAGE

The main page shows all the controls you need to create an inspiring sound for your composition.

2.1 GLOW SLIDER

Glow creates randomly evolving sound textures that change depending on the user's input. Move the slider to the left to get the sound of a concert harp. Start moving the slider to the right to hear simple chords evolve into mesmerizing sound worlds.

ha•pi - Concert Harp – Manual - 4

2.2 COLOR SELECTION

Click on a color name in the upper right drop-down menu to choose from several color presets the SONUSCORE team created for you.

2.3 MAIN CONTROLS

The MAIN CONTROLS give you access to the basic settings you need to shape your own sound and get the most out of SONUSCORE's ha•pi.

ATTACK: Adjust the ATTACK of the chosen instrument.

RELEASE: Adjusts the RELEASE of the chosen instrument.

DYN. RANGE: Adjusts the dynamic range of ha•pi's sound.

HARMONICS: Adjusts the mix of two different harp playing styles. From the natural-sounding harp on the left to just harp harmonics on the right.

TONE: Adjusts the sound character by adding more low-end frequencies on the left and stressing the shimmering highs on the right.

REVERB: Choose between three types of reverb effects and adjust the amount.
