TMS FNC WebSocket v1.0.4.0 (04 Feb 2025) for Delphi & CB XE7-12 Athens Full Source

2025-01-14 23:33:26

TMS FNC WebSocket offers seamless integration for WebSocket server and client functionalities across various platforms, including VCL, FireMonkey, and TMS WEB Core. With a unified, high-performance codebase, it simplifies communication by allowing the sending and receiving of both binary and text messages effortlessly.

Ensuring security, it supports the WebSocket Protocol over TLS for encrypted connections, providing peace of mind for data transmission. Its minimal property setup streamlines configuration, adhering to RFC 6455 standards for WebSocket Protocol implementation.

Moreover, facilitates easy integration with HTTP/HTTPS-compliant servers through webhook support, making it ideal for versatile application scenarios. Additionally, it features dedicated components for WhatsApp webhook support, enhancing its utility for diverse communication needs.

Key Features of **TMS FNC WebSocket** :

1. Seamless integration for WebSocket server and client functionalities
2. Compatible with VCL, FireMonkey, and TMS WEB Core
3. Unified, high-performance codebase
4. Support for sending and receiving binary and text messages
5. WebSocket Protocol over TLS for encrypted connections
6. Minimal property setup for configuration
7. Implementation adheres to RFC 6455 standards
8. Easy integration with HTTP/HTTPS compliant servers through webhook support
9. Dedicated components for WhatsApp webhook support
