This Studio Portraits Lightroom and Photoshop ACR preset is ideal to capture portraits using studio lighting. The edit gives the images an elegant magazine look thanks to its subtle color toning especially when it is shot against a neutral background. This is great for corporate headshots as well as more casual lifestyle headshots.

There are two versions that are available of this Studio Portrait preset - a normal, and a warm variant. Additionally, there is a single-click tool for boosting contrast.

### COMPATIBILITY

- The best results are obtained using RAW/DNG files. Results from Jpeg files can be unpredictable.
- Works with Lightroom Classic Desktop. Mobile Version in a different listing.
