平面设计　　Tutorial

SolveSpace – Start with 3D Desging & printing: This hands-on project is specifically crafted for beginners, providing a practical and immersive introduction to the powerful features of SolveSpace CAD software. Instead of delving into theory, we jump straight into the practical aspects of using SolveSpace. Throughout this course, you will focus on designing a customized housing or enclosure for an IoT device, such as the ESP32. Harness the open-source capabilities of SolveSpace and cultivate fundamental CAD design skills as we work through the project from inception.

Lessons Covered in This Class (Total Duration: 26 minutes):

- Introduction (0:35)
- Downloading SolveSpace (2:19)
- Creating the Base Plate (2:39)
- Extruding and Processing into a Housing (4:14)
- Crafting a Cutout for a Button (5:34)
- Adding Printable Text to Your Housing (2:57)
- Incorporating Chamfers (2:02)
- Designing a Lid (2:49)
- Stressing the Importance of Deleting History (0:50)
- Assembling the Box and Lid (2:48)
