FastStone Capture v11.1 Multilingual

2025-10-09 20:43:19

is a great lightweight screen capture and video recording tool. It allows you to effortlessly capture and annotate any screen content, including windows, objects, menus, full screens, and specific regions, as well as scrolling windows and web pages. Additionally, **FastStone Capture** can record all screen activities such as on-screen changes, microphone input, speaker audio, webcam feed, and mouse movements and clicks into highly compressed video files.

Captured content can be sent to the editor, saved as a file, copied to the clipboard, printed, emailed, or inserted into OneNote, Word, Excel, or PowerPoint documents, or uploaded to your website. The built-in editing tools support annotations (text, arrowed lines, highlights), resizing, cropping, sharpening, watermarking, and applying edge effects, among other functions. Other notable features include image scanning, global hotkeys, automatic filename generation, external editor support, a color picker, a screen magnifier, a crosshair, and a ruler.

FastStone Capture supports various image formats, including BMP, GIF, JPEG, PCX, PNG, TGA, TIFF, WEBP, FSC, and PDF. The built-in screen recorder saves videos in MP4 and WMV formats.
