AeScripts FractalMapper v1.3 For Mac:

Map After Effects layers into Magnificent fractals.

Has an advanced"morph" attribute which may be used for groovy alterations in and outside of this fractal.

FractalMapper is a GPU accelerated plugin for Adobe After Effects that lets you create/draw fractals and kaleidoscopic effects and adjustments using your personal images or footages.

The fractal mapper supports many fractal forms and coloration methods. Additionally, it permits you to"Morph" in and from the fractal so it's possible to use it to get groovy transitions. The plugin provides full control over the conversion and fractal settings.

- GPU Accelerated - Programs your graphics card for realtime rendering making researching fractals tons of pleasure
- Morph - lets you interpolate between the source image and the fractal
- Transformation - Alter the fractal in addition to the origin picture within the fractal
- Fractal Forms - Mandelbrot and Julia genuine and fanciful with Electricity of Z controller
- Colorize - Total Hue/Saturation/Brightness and Opacity controller
- Edge Duplicate - Turns FractalMapper into a kaleidoscopic filter!
- Quantity of Passes - Fundamentally a recursive result to make really glitchy And intricate images.
