TOWN & COUNTRY: NATURALISTIC FEEL AND HUMAN TOUCH

Town & Country is packaged with diverse ambient recordings of nature sounds connected with man-made sounds. The majority of the documents are loopable. It's the best audio library for scenes beyond the city in rural places.

REALISTIC AMBIENCES

TOWN & COUNTRY supplies a wide selection of professional sounds to produce perfectly persuasive and realistic city and state ambiances in high quality. Besides a solid and broad base of city and country lifestyle, we concentrated on credible ambiances filled with detail and, at the same time, leave enough space to put the additional sound style in the foreground.

MAJOR STRENGTH: FLEXIBILITY!

The principal portion of the library is made of extensive -- largely loopable -- history ambiances with varying daytimes and areas of city & state sceneries. More detailed and readily accessible sounds of e.g., campfire, farm animals, or an incredibly impressive file with flies onto roadkill are another powerful addition to your SFX pool.

Over 200 documents of the vibrant city and state nights and days provide you with all the flexibility you want to bridge the difference between a rural state life with critters and a man-made city. TOWN & COUNTRY includes all vital components to look at organic and grounded acoustic backdrops while maintaining a naturalistic texture and human contact.

WHAT WE RECORDED

We recorded an extremely wide set of average ambiances as we listed over 8 GB of city and state mornings, nights, and days, including wildlife, people, functioning noises, traffic, fire, water, woodlots, windmills, and far more.

Our aim was to supply you with very flexible ambient libraries to get a natural and organic acoustic surrounding for many probable configurations of Town and country scenery.

catering to different themes and genres.

WAV is a common audio file format that retains high-quality, uncompressed audio. It's a standard format for professional audio recordings.

TOWN & COUNTRY WAV™ is a collection of WAV-format sound effects recorded and curated by Boom Library, focusing on sounds associated with both town and country environments. These could range from urban sounds like traffic, street ambiance, and city life to rural sounds like nature, animals, and more.

Sound designers, filmmakers, video game developers, and other multimedia creators often use such libraries to enhance the auditory experience of their projects. They can integrate these sound effects to add realism, atmosphere, and depth to scenes.
