Aescripts L3tt3rM4pp3r2:

Lettermapper 2 is an exclusive After Effects GPU-rendering engine tailored to generate textmode art. The plugin includes a fresh collection of creative control options, such as different text modes like CGA and VGA, for creative assistance. In addition, with a basic ASCII character set upward, the user can produce custom textmode styles, unleashing any imaginable texture.

- Self-Redesigned Textmode Styles:** You can now easily define your own symbols, including Katakana, Klingon, or any ASCII character.
- Output Brightness:** Users can now make class adjustments by changing brightness settings without altering the input picture.
- Colour Styles:** Options enabling toggles across multiple colour schemes are effortlessly available for the users.
- Photoshop:** Custom symbol map textures have now been made easier by Photoshop.
- User Interface:** Adding new features saves users time while making navigation effortless.
