**Blender 3D: Create a Jack-o'-lantern Scene:** The Blender course is suitable for beginners and will teach you how to build everything within this scene. I've created this course to help beginners get started. Learn to make the perfect 3D models and characters. Learn how to create organic objects, use bones to rig specific objects, apply the materials using Blender material nodes, and then add lighting to make your scene come to life. Then, I will show students how you can render their finished scene using Cycles.

- What is the best way to create an a-la-carte (Pumpkin)
- The art of carving the mouth and eyes
- Utilize the basic techniques to create the stem
- Make material for the pumpkin as well as the stem with nodes
- The scene is lit
- Create an image camera and render it with the Cycles Renderer
