

Batch XLS to PDF Converter v2025.17.916.2071

2025-11-14 20:20:55

is an easy-to-use tool for quickly converting Excel files (XLS/XLSX) into PDF format. Whether working with individual files or large batches, this software simplifies the conversion process with a friendly graphical interface and drag-and-drop functionality. It's designed for casual users and professionals who need to handle multiple Excel-to-PDF conversions efficiently.

One of the key advantages of this converter is its batch-processing capability. You can convert multiple files at once, saving time and effort, and it even supports searching for files across folders for quick access. Additionally, the multi-threaded conversion engine ensures high-speed performance, and you can pause, stop, or resume your tasks whenever you like. You can also save your work in project files for later use, making repetitive tasks easier.

Batch XLS to PDF Converter offers flexibility with its support for both graphical user interface (GUI) and command-line options. This means you can use the software manually or automate tasks through commands in Windows Explorer. It's also compatible with a wide range of Windows versions, from XP to Windows Server 2012, and works seamlessly with Microsoft Office versions from 2000 to 2013.

Key Features of Batch XLS to PDF Converter :

1. Convert Excel to PDF: Easily convert individual or multiple XLS/XLSX files into PDF format.
2. Batch Conversion: Process large sets of files at once, reducing manual effort.
3. File Search: Search for files within folders for quick access and efficient conversion.
4. Drag-and-Drop Support: Simply drag files into the software for easy processing.
5. Windows Explorer Integration: Right-click on files in Explorer for quick conversions via the context menu.
