How to Improve Your Video Quality: Greetings, I'm Harry, and I've created online lessons spanning University Courses, YouTube, Patreon, Instagram, and more. This course is tailored for musicians and creatives venturing into the online teaching realm or seeking to enhance their video production skills. Drawing from my own experiences, I've curated a comprehensive guide covering:

- Selecting the Right Camera
- Choosing the Ideal Lighting Setup
- Camera Adjustment Techniques for Optimal Video Quality
- Lighting Strategies for Shooting Behind a Drum Kit
- Audio Essentials and Recommended Equipment
- Overview of Free and Paid Video Editing Software
- Platform Selection for Uploading Content
- Audio Presets for High-Quality Sound in Logic and Premiere Pro
- Insights into My Setup and Workflow

My goal is to provide valuable insights into these topics, empowering you to make informed decisions when purchasing equipment and expanding your expertise in video course creation. Join me in this course, and let's embark on this journey together!
