A few FAQs

Q What is the number of presets included in this bundle?

A: 11 presets included in the pack.

Q: How can I utilize these presets?

A: The presets are designed to be used with Adobe Lightroom Software. It is necessary to install the presets to utilize the presets.

Q What is the reason why my pictures don't look as good as yours after applying them?

A: I design custom presets every week, so even if the ones you bought do not look like my photos, do not be concerned. The presets I have up for sale are a blend of my favorite styles and you need to alter the filter in a way that makes it appropriate for the image you're editing.

Q: Do I need to take RAW photos to be able to use these presets?

A: None of the presets can be used on every image you have in the JPEG images. It is recommended to take your photos in RAW since they hold the most information and data to edit.

Q: What Lightroom version will these presets be compatible with?

A: The presets work with all Lightroom Classic CC.
