Claris FileMaker Pro v22.0.5.500 for Win & macOS & Server v21.0.1.51

2026-03-13 15:12:27

Experience unparalleled development capabilities and scalability with **Claris FileMaker Pro**, empowering you to create high-performing, reliable, scalable custom applications. Benefit from the latest advancements in the platform, which have been delivered at an unprecedented pace over the past several years, opening up opportunities for integration with technologies like JavaScript and JSON to solve a wider range of business challenges.

With , enhance the performance of your custom apps and increase scalability with expanded hosting capacity for users and files, all while ensuring the utmost protection for your data through updated security protocols. Develop powerful operational apps confidently with FileMaker's new features and capabilities, spanning development flexibility, performance optimization, and enhanced security measures.

Effortlessly tackle diverse business problems by leveraging FileMaker's open and extensible platform, facilitating seamless integrations with JavaScript, OData, REST APIs, and more. Enjoy a more intuitive user interface for streamlined software development and leverage reusable code such as JavaScript add-ons to expedite development. Benefit from enhanced scalability, with the ability to host up to 1,000 simultaneous **Claris FileMaker Pro** WebDirect users and 256 files without sacrificing performance. Additionally, rely on extensive performance, stability, and reliability improvements based on developer feedback, ensuring confidence in the applications that drive your business operations.

Key Features of **Claris FileMaker Pro** :

1. Open and extensible platform for easy integrations with JavaScript, OData, REST APIs, and more
2. Intuitive user interface for streamlined software development without compromise
3. Reusable code capabilities, such as JavaScript add-ons, for faster and more intuitive development
4. Scalability with support for up to 1,000 simultaneous Claris FileMaker WebDirect users and hosting of up to 256 files without performance compromise
5. Extensive performance, stability, and reliability (PSR) improvements based on developer feedback
6. Backend infrastructure upgrades to OData 4.01, Java 17, Node.js 18, and more for efficient system operation
7. Support for Ubuntu 22 LTS on Intel and ARM processors for optimized Linux deployment
8. Enhanced security protocols, including support for Open SSL 3.0, Send Mail with OAuth 2.0 authentication and audit

所有软件资源 100%安全 已检测 无病毒 无篡改
