Making or creating that perfect drum kit is among of the toughest tasks in the field of music creation...

I created 60 tested, sonically proven tuned kick drums precisely modeled on the most popular musicians of today. They're designed specifically to help you have the confidence to construct your song around as strong the starting point as you can.

Stop thinking that you require millions of kicks as well as powerful processing chains to create the kick you'd like. These kicks are by far the top of the line as the following examples show. Take a listen!

Hyperbits Boom Specs

- 60 Artist Kicks
- Works with all DAW
- Size of File 12 Megabytes
