

Spire.Presentation for .NET v10.2.0 (28 Feb 2025)

2026-07-13 20:55:01

Spire.Presentation for .NET is a professional PowerPoint® compatible API that enables developers to **create**, read, write, modify, **convert** and **Print** PowerPoint documents on any .NET platform (Target .NET Framework, .NET Core, .NET Standard, .NET 5.0, .NET 6.0, .NET 8.0, .NET 9.0, .NET 10.0, Xamarin & Mono Android). As an independent PowerPoint .NET API, Spire.Presentation for .NET doesn't need Microsoft PowerPoint to be installed on machines.

Spire.Presentation for .NET supports PPT, PPS, PPTX and PPSX presentation formats. It provides functions such as **managing text**, **image**, **shapes**, **charts**, **tables**, **animations**, **comments**, **hyperlinks**, **watermarks**, **audio** and **video** on slides. It also supports exporting presentation slides to **images** (PNG, JPG, TIFF, EMF, SVG), **PDF**, **XPS**, **HTML**, **Markdown**, Video format etc.
