Tailored for busy professionals, this course covers all the fundamental aspects of creating 3D garments in the most time-efficient manner possible. Regardless of your experience with 3D modeling software, the course starts from the basics, guiding you through setup and navigation fundamentals.

This comprehensive course takes you from a novice in 3D software to a proficient Clo3D user in just over 4 hours. The lectures are designed to be concise and straight to the point, delivering maximum information quickly and efficiently. By the course's end, you will have developed a portfolio featuring several projects showcasing your newfound skills on your CV.

Course Highlights:

- Develop realistic 3D models of garments.
- Transform a design from a block to a complete 3D garment.
- Add patterns to Clo by importing PDFs and AI files, tracing images, or drawing directly on the avatar.
- Set up and navigate within Clo.
- Customize avatars in appearance, size, and pose, and create and save custom avatars.
- Learn flat drafting for a skirt block in Clo.
- Understand auto grading and manual grading in Clo.
- Master scaling, transforming, and moving patterns.
- Add and remove seam allowances, annotations, and symbols.
- Sew patterns in Clo and dress avatars.
- Change fabric appearance and behavior.
- Assess fit using maps.
- Utilize pins, tacks, and steam in Clo.
- Add various design elements such as elasticated waistbands, yokes, zips, buttons, patch pockets, topstitching, puckering, fullness, and pleats.
- Explore fabric properties in Clo and manipulate print and transparency.
- Quickly modify designs in modular mode.
- Work with graphics and textures.
- Calculate fabric requirements and costs.
- Present garments in multiple colorways.
