Devart dotConnect for Salesforce Professional v6.0.0 (18 Dec 2025)

2026-01-12 11:47:18

is a robust ADO.NET provider tailored for seamless integration between .NET applications and Salesforce. Offering exceptional speed, flexibility, and comprehensive features, it simplifies the process of incorporating Salesforce data into C# or VB.NET projects. By providing standard ADO.NET classes like SalesforceConnection and SalesforceCommand, dotConnect for Salesforce enables developers to swiftly access Salesforce data without delving into the complexities of Salesforce API or SOQL queries.

With **Devart dotConnect for Salesforce Professional**, developers can build data access layers effortlessly, thanks to its intuitive design-time editors and seamless integration with Visual Studio. This allows for streamlined configuration of components and easy binding of data grids and controls to Salesforce data. Moreover, the solution facilitates SQL integration, empowering developers to execute SQL queries against Salesforce data, including essential CRUD operations, without requiring intricate Salesforce API usage.

Devart dotConnect for Salesforce Professional boasts full support for Entity Framework, Microsoft's recommended data access technology, enabling developers to leverage features like LINQ to Entities and entity relations with Salesforce data. This is complemented by a bundled visual designer for ORM models within Visual Studio, enhancing productivity and facilitating efficient development workflows. Overall, **Devart dotConnect for Salesforce Professional** is a comprehensive solution for .NET developers seeking seamless integration with Salesforce, backed by exceptional performance and ease of use.

Key Features of **Devart dotConnect for Salesforce Professional**:

所有软件资源 100%安全 已检测 无病毒 无篡改

标签

ASP.Net Components .Net

1. Seamlessly integrate Salesforce data with .NET applications
2. Utilize standard ADO.NET classes for easy implementation
3. Access Salesforce data via SQL or LINQ queries without the need for Salesforce API knowledge
4. Simplify development with intuitive design-time editors and Visual Studio integration
5. Execute SQL queries against Salesforce data, including CRUD operations, without complex API usage
6. Full support for Entity Framework, enabling LINQ to Entities and entity relations with Salesforce data
7. Bundled visual designer for ORM models within Visual Studio, enhancing productivity
8. Comprehensive exception and memory leak detection
9. Effortlessly catch every exception and memory leak directly on end-user PCs
10. Generate detailed logs of call stacks for efficient bug resolution
11. Optional email or web bug-tracker notification for log entries
12. Backed by a 60-day money-back guarantee for peace of mind.
