

BDE Installer for RAD Studio XE7 - 11 Alexandria Full Source

2026-09-09 11:35:48

It has the ability to provide an abstract set up of the BDE Parts in RAD for the Delphi, C++ Builder and a few more to be mentioned. It should be added that he has attained the last phase of the deprecation process and it was eliminated from the RAD Studio. The user is invited in order to migrate the software to the new technology just like the fire DAC.

- The user has the ability to install the components of BDE and perform the following steps such as:
- Downloading the outside installer of the BDE for the user and developer out of the sectionals My enrolled user downloads.
- Following to measure the project that are using the units of BDE have the tendency to be populated adequately and if the user desires to observe the elements in the IDE, then the user has to set up the plan package for the parts of BDE and then click on the button to insert.
- The navigation to the bin folder of the setup of IDE as well as searching for the user documents database upon the model.
- It should be noted that they use their desires 10.3 real to be installed and to bring the BDE of the user setup.
- It is mainly available for the users of the Delphi as well as the Builder of C++, RAD Studio, and finally the Embarcadero All Access XE for the users and developers.
