TMS Business Core Library v2.1.0.0 (24 Mar 2026) for Delphi XE2-13 Florence Full Source

2026-05-10 19:42:08

TMS Business Core Library offers a comprehensive suite of essential components for VCL or FMX applications, providing a robust foundation for business logic implementation. This subscription-based service includes vital functionalities such as Object-Relational Mapping (ORM), REST/HTTP/JSON framework integration, data modeling capabilities, and more.

Key components within this library include TMS Aurelius, a feature-rich ORM framework enabling sophisticated data manipulation, complex querying, and support for advanced concepts like inheritance and polymorphism. Additionally, TMS XData facilitates multi-tier application server development with seamless integration of REST/JSON communication and ORM remoting.

Other integral components encompass TMS Sparkle, facilitating HTTP client and server development across platforms, and TMS Sphinx, offering Identity Access Management functionalities for authorization and authentication in Delphi server applications. Moreover, includes TMS Logging for streamlined cross-platform logging, TMS RemoteDB for developing 3-tier database applications, TMS Scripter for embedding scripting capabilities, TMS Echo for efficient data replication, and TMS Data Modeler for comprehensive database modeling tasks.

To leverage the full suite of TMS products mentioned, installation of the **TMS Business Core Library** is indispensable, providing a cohesive platform for seamless integration and efficient development of robust business applications.

Key Features of **TMS Business Core Library** :

1. Subscription-based library for VCL or FMX application development
2. Includes essential components for business logic implementation
3. Features Object-Relational Mapping (ORM), REST/HTTP/JSON integration, and data modeling capabilities
4. Core components such as TMS Aurelius for advanced data manipulation and querying
5. TMS XData for multi-tier application server development with REST/JSON communication
6. TMS Sparkle for cross-platform HTTP client and server development
7. Additional tools include TMS Sphinx for Identity Access Management and TMS Logging for streamlined logging
