AppPerfect Test Manager v16.0.0.20220323-68 for Win & macOS

2024-12-27 08:30:15

The AppPerfect Test Manager is a Test Automation and Management System. It's made for users implementing various AppPerfect Web application testing and Java improvement solutions. It's a central server using a Web-based UI for obtaining a variety of modules from the machine. AppPerfect Test Manager includes the following main modules:

- Projects Manager: You can use this module to specify your application/project in Evaluation Manager. Produce a job with as much information as you can. Establish your staff members, project leader. You can specify many keywords for your program. These keywords are useful in searching your undertaking.
- Prerequisites Manager: This module is used to make requirement specifications that your evaluations will be made and implemented. It would help if you defined functional, company, functionality, usability, and technical needs to ensure the evaluations cover all of the defined criteria.
- Exam Manager: After tests are designed, You may use the Evaluation Manager to deal with the implementation of your evaluations. Automatically running tests on a particular program, notification of evaluation results, saving evaluation results, etc., could be defined within this module.
- Outcomes Manager: After your different tests have conducted several iterations, You may use the Outcomes Manager to handle the archived outcomes. Trend Analysis of numerous outcomes to discover essential quality trends is an integral aspect of this module. Storage management may also be carried out through this module.
- Bugs Manager: As tests are conducted, bugs like defects, enhancements, modifications, etc., will happen. You may use this module to produce and monitor such troubles. This module was created as a lightweight bugs supervisor that incorporates the rest of the machine and isn't meant to replace a full-featured bugs control system.

AppPerfect Test Manager is an essential host in which You can share data with all developers, QA staff, and supervisors utilizing its own cosmopolitan UI. It provides easy integration with Different AppPerfect programs (Load Evaluation, Internet Evaluation, Program Test, Java Code Test, and Java Unit Test).

The AppPerfect Test Manager provides a central data store in which evaluation requirement, AppPerfect undertaking, project/test implementation outcome, the bug becomes saved. It incorporates tasks like demand specification, test preparation, test implementation, outcome analysis, and pest monitoring into a single program that will assist you in controlling and manage your software testing.

A fundamental data store where evaluation requirement, AppPerfect undertaking, project/test implementation outcome, the bug becomes saved. It incorporates tasks like demand specification, test preparation, test implementation, outcome analysis, and pest monitoring into a single program that will assist you in controlling and manage your software testing.

AppPerfect Test Manager Great Features:

- Supports Entire Testing Procedure: The AppPerfect Test Manager supports the whole testing procedure beginning from requirements gathering and direction; test/project development, scheduling, and implementing evaluations; problems direction; simple to work with Web-based UI.
- Web-based UI: The AppPerfect Test Manager utilizes a three-tier program architecture using a pristine Web-based user interface. The UI is intuitive and simple to use. It's not necessary to install massive software or applets to have the ability to handle your testing procedure. With just a browser and Internet access, you can easily and easily keep track of your software testing.
- Informative reports: AppPerfect Test Manager provides strong, real-time, enlightening, and precise reports that help you trace issues within the computer system. Reports are usually utilized to examine data that spans over a time period. AppPerfect supplies you with extensive coverage capability. It's possible to personalize and create reports that give you information that's tailor-made to your needs. It lets you leverage existing content in many formats. You can create reports in HTML, PDF, CSV, and XLS formats.
- Scheduling of evaluations: You can organize your evaluations with the AppPerfect Test Manager. You don't need to be
