SubSystems HTML to RTF Converter v17.0 for .Net

2025-01-01 22:15:08

HTML - RTF Converter delivers a very simple and hassle-free way of switching between HTML and RTF formats inside your program. You'll make only 1 function call to perform the conversion.

No additional external elements or programs will be needed if you use this specific converter. The converter comprises a highly effective RTF parser used by our TE Edit Control merchandise. Additionally, it comes with a strong HTML parser used by our HTML Add-on merchandise. This converter combines the performance of TE Edit Control and HTML Add-on to offer you a cost-efficient, feature-rich, and powerful translator.

HTML - RTF Conversion supports the following attributes :

- Conversion between HTML into RTF, and RTF to HTML.
- Fonts, point-size, various personality designs, and colors.
- Paragraph formatting attributes like centering, justification, indentation, etc...
- Support for PNG, JPEG, GIF, EMF, and WMF picture formats.
- Embedded and related images. The embedded images in the RTF documents are automatically stored to disc using a connection in the created HTML file.
- Headers/footers.
- Table and nested tables.
- Unicode support.
- Set paper size, orientation, and perimeter distance for RTF output.

Code Output: The created HTML or RTF code could be written to a disc or it may be recovered in a memory buffer. The RTF data recovered in a memory buffer could be loaded into an RTF edit control including TE Edit Control.

Programming Interface: Your program only uses function calls to perform the conversion. The Win32 and Win64 models contain the purpose and constant declaration documents for C/C++, Visual Basic, and Delphi. The item is usable in almost any environment that allows for phoning easy DLL functions.

The .NET edition of the item consists of pure C# controlled code. The .NET variant may also be used in an ASP.NET server program.

The Win64 version comprises the purpose and constant declaration documents for C/C++.
