Complete Beginners Guide to Blender 3D: My name is Harry! I'm a professional 3D artist with more than ten years of expertise. I've worked most recently as the Studio Director at an award-winning Architectural visualization company.

In this course, we'll learn everything we need to start working using Blender!

We'll go through the entire process of learning to use Blender from a complete beginner's viewpoint to prevent the most confusion possible. Each topic we cover builds on prior lessons to create the base throughout the course.

How can we learn the fundamentals of using Blender?

You can use the course "Complete Beginners Guide to Blender 3D."

Where can I download the product?

After subscription, You can download it for free from here.

Gfx plugin details of Complete Beginners Guide to Blender 3D

The product is in the **Tutorial category**, for more information about this post, you can click on the home page link in the sidebar.

I created this whole class to be based on a pre-made template file. You'll be able to access every model I use in the class, meaning you'll never have to be concerned about being unable to capitalize on a vital tool or feature!

Please note that Blender 3.6 or greater is required to run the file as a starter!

This class is designed to help you understand the basics of Blender and will not focus on version-specific features. This means that even if you take this course and you are using Blender 4.0, 4.5, or even higher, you will still build an understanding of the basics!

Through this class, you'll learn the basics of nearly every aspect of 3D art in the time you spend with me.

You'll be able to learn about topics such as:

- Downloading and Installing Blender
- Interface Navigation
- Editing Objects
- Organizing Your File
- Common Modeling Tools
- Materials
- Modifiers
- Lighting
- Animation Basics
- Camera Placement and Settings
- Saving Your Final Image
- and much more!

You'll create:

Once we've established an adequate foundation, we'll walk students through the class project. During this, you'll build and
