BONUS TOOLKIT PRESETS

- Add artful blurring around the subject (Preset)
- Saver for Subjects that are Overexposed (Preset)
- Boost Subject (Preset)

*3 different versions of the same version are included.

Importantly, PLEASE READ ALL the information below:

The presets are tested on multiple images using different tones, gear, and lighting in order to guarantee a high-quality pre-set that is constant across different shoots.

For the best results, always adjust the exposure and white balance prior to making use of the preset. The presets are not able to evaluate your photos to correct an underexposure or off-white balance. Therefore, it should assume the image has been balanced and exposed correctly before applying. If you do not pre-edit these two elements, it could result in unwanted outcomes.
