Batch DOC to Help Generator v2025.17.204.3934

2025-11-04 21:16:25

is a simple and powerful tool designed to automatically convert Word documents (DOC/DOCX) into CHM HTML Help and Manuals. Whether you're creating help files for software or manuals for users, this tool makes the process quick and easy. With an intuitive interface and drag-and-drop functionality, anyone can use it without technical expertise. It's designed to handle individual files or entire folders, saving you time and effort.

The tool also offers batch conversion, allowing you to convert multiple files simultaneously. This feature, combined with a powerful search function, makes it easy to manage large documentation projects. The **Batch DOC to Help Generator** also comes with command-line support for advanced users, letting you automate tasks and run projects seamlessly. You can save your work in a project file for future use, simplifying repetitive tasks.

Its high-speed multi-thread conversion engine ensures that the process is quick, and you can pause, stop, or resume the conversion as needed. It supports all modern Windows operating systems and works with Microsoft Word versions from 2000 to 2013. Overall, **Batch DOC to Help Generator** is perfect for creating professional help documentation efficiently.

Key Features of **Batch DOC to Help Generator** :

1. Word to CHM Conversion: Automatically converts Word DOC/DOCX files into CHM HTML Help and Manuals.
2. Batch Conversion: Converts multiple files simultaneously, saving time on large projects.
3. Folder Support: Converts all DOC/DOCX files in a folder in one go.
4. Drag-and-Drop & Context Menu: Simplifies the process with drag-and-drop support and right-click menu options in Windows Explorer.
5. Search Functionality: Includes a powerful search tool for managing large file collections.
