Tools　　Protectors
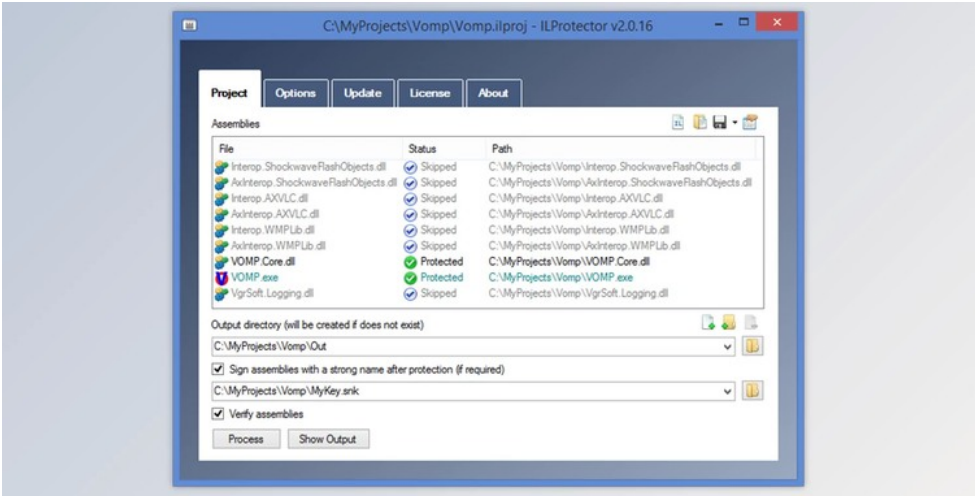

ILProtector is considered to be a guardian for the software of the, .NET. ILProtector was basically created in order to safeguard the intellectual property of the program itself for the users and the programmers. ILProtector has the ability to safeguard the user .NET code right from the reverse engineering process, decompiling as well as changing. The ILProtector has the ability has the capability to transform the intermediate languages for the users as well as the codes to certain forms which is not recognized by the decompiler and the disassemblers just like the IL DASM, .NET Reflector, ILSpy, and last but not least the dot Peek, and so on. It was basically developed and preserved for the users and the programmers by vgrsoft.com and it first began as a free application that was basically concentrated on the process of shielding. Today, it has the recent variant and it has compensated on the process of shielding and has the ability to provide more features and information about the process of licensing. The user is lucky as the user has the ability to utilize the old version openly and one other fantastic thing and feature about the software is that it has the ability to supply the command line interface so that the user has the ability to incorporate and as easily require the third-party application just like the utilization from the visual studio.

VgrSoft ILProtector Great Features:

It has the following features and attributes that are stated as below such as:

- There is the software code security available.
- The process of string encryption can be done by the users and the programmers.
- It has a high performance.
- It does not use the undocumented features at all.
- There is a total support for the process of manifestation, and it does not use the documented features for the assemblies that are secure.
- It has the ability to support the windows x32, x64 as well as the software of the desktop.
- The command line services are available for the users and the programmers thanks to the ILProtector.
