This class will show the techniques to make several colors from one image making use of Adobe Photoshop. We will explore the application of layer Comps and Adjustment Layers. We will also examine some fundamental artistic concepts like the process of experimentation and iteration, and working with color and layers in Photoshop.

If you're looking to discover colors and create beautiful sequences of work, similar to Andy Warhol as well as enhancing your Photoshop skills, this course is perfect for you.

This class is designed for photographers, artists, designers, or anyone who is interested in working using Photoshop.
