ProdbyJack The "Chromatic" One Shot Library (WAV): Over 250 essential one-shot sounds created using rare synths and instruments. These categories include Leads, Pads Keys, Basses and Plucks Guitars, Bells Textures, and much more.

What's Inside?

The Chromatic One Shot library has more than 250 sounds that are distributed across a variety of categories and folders

Rare Synths

Within the synth section of this kit, you'll find 150 thrilling sounds that were recorded using the rarest synths on the market. Like"JD800" the Roland "JD800" the Korg "MK700" the Roland "Juno 106" and numerous others. Each of them has been sampled, designed recorded, and altered by me to create something unique but usable.

Live Instruments

It was initially intended to be a synth-centric one-shot kit. I decided to add 75 of the sounds I sampled from live strings and keyboards. For example, the Rhodes piano, or other Fender woodwinds and guitars. You can access unique instruments at less than the cost.

Pedal Textures

I've recently rediscovered Guitar pedals specifically the Microcosm pedal from Hologram. It played a major role in the development of the sound kits particularly the 35 sounds and phrases that are included. The sounds are all random sounds created by Microcosm Microcosm produced, that I cleaned and organized for you to play.

Includes

- 1. Synths\Pad\Carti Chord - Prophet Rev 2 [Pad] Chromatic®.wav
- 1. Synths\Pad\Dark Synth - Deep Mind 12 [Pad] Chromatic®.wav
- 1. Synths\Pad\Falling Synth [Pad] Chromatic®.wav
