Mysterious glowing mushrooms of the Dark Forest. I'll give an explanation for the entirety that is to understand about these techniques.

How to create lighting and composition in an image?

You can change the lighting of an image beautifully by using "Laanscapes – Glowing Mushrooms Processing Video".

Where can I download the product?

After subscription, You can download it for free from here.

We'll begin with a single mushroom and illuminate it with an LED. The task right here is to mix exposures seamlessly. The 2nd section is greater complex. We take the identical method and follow it to more than one mushroom in one frame.

What's Included?

- Part 1: "A Trip to the Forest (raw only)" - Fully annotated.
- Part 2: "The Magic Mushroom (in full)" - Partly annotated.
- In-depth article that discusses lighting, composition, and even discovering mushrooms.
- PSD-file (resized) of "The Magic Mushroom" with each adjustment nonetheless present
- Readme file linking to extra tools
- My special interest goes out to get that darkish temper this is so generic in any of my works.

This genuinely is a whole tutorial and I have confidence this will get you to the subsequent stage in post-processing now not simply mushrooms, but many extra panorama topics as well.

What Will I Learn?

Two hours of video material, in which you will learn:

1. Preparing uncooked files

- Perspective Alterations
- Raw pre-sharpening
- Getting the white balance right
- When to use the HSL sliders
- Balancing Clarity, Dehaze, and Contrast
- The Smart Object Workflow
- Raw Transformations

1. Merging more than one images

- Aligning Layers
- Blending Layers manually

1. Luminosity Selections (RGB Channels and Tony Kuyper's luminosity masks)

- Dodging

1. Raw changes with Smart Objects
2. Orton impact and element recovery
