

MAMP & MAMP PRO v5.0.6.7029.0 for Win & v6.9 for macOS

2025-07-12 10:48:19

MAMP PRO is the premium, professional interface for the renowned local server environment, **MAMP**. By leveraging **MAMP PRO**, users can effortlessly create dedicated hosts for each web project, streamline WordPress installation with a single click, and publish completed sites directly to live servers. Catering particularly well to WordPress development on MacOS, offers a robust set of features that extend far beyond basic server functionality, making it an essential tool for web development.

On the other hand, **MAMP** stands as a free, user-friendly local server environment available for both MacOS and Windows platforms. With a quick installation process, **MAMP** equips users with all the necessary tools to run WordPress or other software on their desktops for testing or development purposes. Featuring the local DNS server NAMO, **MAMP** enables easy testing of projects on mobile devices. Whether users prefer Apache or Nginx as the web server or MySQL as the database server or work with various programming languages like PHP, Python, Perl, or Ruby, **MAMP** offers a versatile and convenient solution for local development environments.

Key Features of MAMP & MAMP PRO:

1. **MAMP PRO** allows the creation of separate hosts for individual web projects
2. One-click WordPress installation and direct publishing to live servers
3. Ideal environment for WordPress development on Mac
4. **MAMP** provides a free local server environment for MacOS and Windows
5. Enables testing of projects on mobile devices through the NAMO DNS server
6. Supports web servers like Apache or Nginx, along with MySQL as a database server
