

Progress Telerik UI for WPF 2024 Q4 v2024.4.1111 (11 Nov 2024) Retail Version

2025-06-08 11:18:23

The **Telerik UI for WPF** toolkit allows developers to build beautiful and responsive Windows desktop applications quickly. It gives you a rich and ready suite of visually clean, highly customizable, and performance-optimized UI components. Suppose you are making a data-driven business or visually rich kiosk application. In that case, Telerik UI for WPF is a complete set of components that will facilitate development without compromising the professional look and feel.

includes a modern and complete library of controls such as grids, a series of chart controls, schedulers, and so on, ensuring that every corner of your application is nice and smooth. Applications that appear modern, user-friendly, and interface with the latest browsing standards require no custom code when you leverage built-in support for themes inspired by popular designs like Office and Visual Studio. On the other hand, developers can build scalable and maintainable applications that run smoothly via robust API and MVVM support of the toolkit.

Telerik UI for WPF, on the other hand, provides powerful productivity tools beyond UI controls — document processing capabilities to process PDF, spreadsheet, & word files without an external library. Also, its AI-powered prompts help make tasks more easily by inspiring task definitions more intuitively. Telerik UI for WPF offers everything you need – simple projects to complex enterprise-grade applications.

Key Features of Telerik UI for WPF :

1. **Extensive Control Library:** A complete set of WPF UI controls for quickly building rich desktop applications.
2. **Modern Themes:** Professionally designed themes inspired by Office, Windows, and Visual Studio.
3. **High-Performance DataGrid:** Advanced capabilities like sorting, filtering, grouping, and more for seamless data handling.
4. **Document Processing:** Direct support for text, spreadsheet, and PDF files without external dependencies.
5. **AI-Powered Features:** Intuitive AI-driven commands to streamline user interactions.
6. **MVVM Compatibility:** Full support for creating scalable and maintainable MVVM applications.
