**Winsoft Burn CD-DVD-Blu-ray Component Suite** offers developers comprehensive components for preparing and burning images to CD, DVD, and Blu-ray optical storage media directly from Delphi and C++ Builder applications. Leveraging the standard Windows Image Mastering API 2, this suite ensures seamless integration and compatibility with Windows Vista, Windows Server 2008, and later operating systems.

Compatible with Delphi/C++ Builder versions 5 through 12 and Lazarus 2.2.6, developers can utilize these components across various project environments. includes source code in the registered version, allowing transparency and customization to meet specific project requirements.

Furthermore, developers benefit from royalty-free distribution rights, enabling cost-effective deployment of their applications utilizing the Burn CD-DVD-Blu-ray Component Suite. It's important to note that while IMAPI 2.0 functionality is supported natively in Windows Vista and later, enabling it on Windows XP and Windows Server 2003 may require the installation of additional update packages or the Windows Feature Pack for Storage 1.0. Additionally, administrator rights or user permissions for media-burning devices may be necessary to effectively utilize CD/DVD/Blu-ray recorders.

### Key Features of Winsoft Burn CD-DVD-Blu-ray Component Suite :

1. Utilizes standard Windows Image Mastering API 2 for preparing and burning images to CD, DVD, and Blu-ray optical storage media.
2. Compatible with Delphi/C++ Builder versions 5 through 12 and Lazarus 2.2.6, offering flexibility across various project environments.
3. The source code included in the registered version allows transparency and customization to meet specific project requirements.
4. Royalty-free distribution rights enable cost-effective deployment of applications utilizing the component suite.
