

Winsoft Direct Office v4.1 for D7-D10.4 Sydney Full Source

2026-09-06 23:11:36

The direct office is a Delphi Open Library of XML for the processing of the documents such as .docx, pptx, and finally the .xlsx for the users and the developers.

WinSoft Direct Office Great Features:

- It can create as well as modify the files of the .docx into Microsoft Word Document.
- It has the ability to create as well as modify the PowerPoint presentation and the files of the .pptx.
- Creation as well as modification of the Excel workbook and the files of .xlsx.
- In this case, the user does not need to install Microsoft Office as it is not required.
- It has unique support for windows 32 as well as Windows 64.
- It has the capability to use the Microsoft Open XML SDK.
- It is very much available for the Delphi 7- 4.
- The process of distribution is royalty-free right in the applications.
