

SubSystems HTML to Image Converter v16.0 for .Net

2025-06-06 10:03:51

HTML to Image Converter delivers a very simple and hassle-free way of switching from HTML to different image formats inside your program. You may make only a few functions calls to perform the conversion.

HTML into PDF Converter can use Internet Browser control to supply for page rendering like IE.

On the other hand, the controller also supplies a Native style performance that does not utilize the Web Browser control or a different third party controller.

The converter paginates the HTML information into lots of print size webpages, then generates Image for every webpage. This enables converting big HTML file into a variety of equivalent size pictures.

HTML to Image Conversion supports the following attributes :

- **Output Image Formats:** BMP, Jpeg, Gif, Png, Tiff, Icon, Exif, and Enhanced Metafile.
- Set paper size, margins, and orientation for Picture output.
- Enlargement or diminishing of output Picture.
- Control on output metafile resolution.
- Publish page header and footers for clickable pages.
- Support for Virtual DPI
- Support for Windows 64bit OS.
- Support for further far-eastern character collections.
- The Internet Browser style supports all HTML formatting attributes supported by IE.

Code Output: The created Pictures can be written to a disc or it may be recovered in a memory buffer.

Programming Interface: Your program only uses function calls to perform the conversion. The Win32 and Win64 variations the purpose and constant declaration documents for C/C++, Visual Basic, and Delphi. The item is usable in almost any environment that allows for phoning easy DLL functions.

The .NET edition of the item is composed using C# managed code. The .NET variant may also be used in an ASP.NET server program.
