Requirements

- You'll require a computer that supports Affinity Designer.

In this class, you'll learn how to create digital products using Affinity Designer.

It comprises four Workshops that will help you understand Affinity Designer on one hand, but also the design process and creation of products in the second.

Learn about HTML0.

- How to draw hand-drawn illustrations and then create vectors using the traced images.
- how to utilize modified brushes within Affinity Designer
- how to utilize text and grid
- how to alter the direction of nodes
- How to modify nodes
- how to alter the colors
- how to include various shapes on layers, even if they're not completely closed
- How to save your files in the correct format
- How to export images

By the end of this class, you'll be capable of creating the vector of an image that you have drawn yourself and a rainbow using brushes for watercolor as well as the Project Life Card and a Heart in Pieces. This is a huge asset for those who want to market digital items. After you've learned the basics, you can create stickers and images suitable for print-on Demand websites or export in a variety of ways.

I'll also teach you ways to e.g. make the Project Life Card and create different sizes using the same template. This can be extremely helpful when you need to meet the various requirements of Print on Demand sites.

All the materials you'll need are provided in the course. After you've completed the workshop, you'll be able to develop your own digital items and sell them via Etsy, CreativeMarket, and more.
