Devart dotConnect for Oracle Professional v11.1.33.0 (24 Feb 2026)

2026-04-08 11:58:59

reimagines Oracle database connectivity with its blend of speed, flexibility, and comprehensive features. It is built on ADO.NET technology and provides a fast and adaptable solution for developing Oracle-based applications. Its rich set of Oracle-specific features, including Advanced Queuing and Transparent Application Failover, empowers developers to create robust database applications easily.

The advanced Visual Studio integration streamlines development workflows, offering GUI tools like the DataSet Wizard and visual component editors for intuitive tweaking. **Devart dotConnect for Oracle Professional** maintains broad compatibility across various platforms and frameworks, ensuring seamless integration from legacy systems to the latest technologies. From .NET Core to Full .NET Framework, it supports various environments, including Visual Studio versions from 2008 to 2022.

Enhanced ORM support and the bundled visual designer Entity Developer facilitate efficient ORM modeling for popular frameworks such as Entity Framework and NHibernate. This comprehensive ORM support enables developers to leverage advanced ORM capabilities effortlessly, further enhancing productivity and accelerating application development. In summary, **Devart dotConnect for Oracle Professional** is a versatile and indispensable tool for optimizing Oracle database connectivity and streamlining application development processes.

Key Features of **Devart dotConnect for Oracle Professional**:

1. Fast and flexible ADO.NET provider for Oracle
2. Comprehensive ORM support
3. Advanced Visual Studio integration with GUI tools
