With the tenth edition of Quest this time, we present an exclusive version of the ExFilm extension set, which gives you an entirely new perspective on the old-fashioned film tones that you know and are fond of. Three colors presets, an original black and white color scheme, and a unique profile that resembles the developing process of pulling or pushing film.

Ten distinct scratch and dust effects modeled on real film scans. These effects give the filmic look to your digital images with just a single click. Self-adapting to cover all of the image, no matter the aspect ratio or orientation.

Since these effects on the brush consume a lot of resources, be sure to enable "Smart Previews" under the Performance tab of your Lightroom settings.

These effects for brushes won't be as effective as normal brushes.

Make sure you apply them before applying any other brush tool edits since they'll overwrite any brushes that are already in use.
