What is Rounded & Matte – 3D Lettering?

"Rounded & Matte – 3D Lettering" typically refers to a specific style or design technique in which letters or text are created to have the following characteristics:

Rounded: The letters have rounded and smooth edges rather than sharp or angular ones. This gives them a softer and more friendly appearance.

Matte: The letters have a matte finish, meaning they lack gloss or shine. Matte surfaces do not reflect light in the same way glossy surfaces do, resulting in a subdued and non-reflective appearance.

3D Lettering: The letters are designed to appear three-dimensional as if they are popping out from the background or surface. This 3D effect is achieved through techniques like shading, gradients, shadows, and highlights, which give the letters depth and dimension.
