Morgan Burks – Winter Bliss Actions Collection: A set of 32 gorgeous actions designed explicitly for winter! These actions work with Photoshop CS, Photoshop CC as well as PSE!

You can give your photos a warm, cozy appearance or enhance those cold shades and colors; this collection will do it!

Winter Bliss contains actions ranging from selectively brightening your images (so that the best parts of your photograph are not lost and don't become over-emphasized) and providing beautiful, creamy designs for those snowy images and even an action that creates the appearance of snow falling. In addition, it has fantastic matte effects to add to the scene in your photos, as well as incredible toning options for changing the colors and tints! Additionally, there are actions to sharpen skin smoothing and removal of color casts!

This collection has everything you need to add sparkle to your winter pictures!
