Dividing Light and Shadow: I've designed this brief course to address a frequent issue: many of my Skillshare students have trouble with shading! This course will show you how to arrange the shading of your drawing effectively. Once you have completed this course, you will be able to draw a clear distinction between the values of light and shadow and draw using a wide range of values, including deep darks and bright light.

To have a more immersive and structured learning experience, I suggest you check out my Art & Science of Drawing series. Students should start with the basics of Skills if they're unfamiliar with drawing. If you want to learn how to shade, go through Shading Essentials and Beyond Basics.

Lessons in This Class:

- Introduction
- Demonstration
- Your Project
